Carlyle Group Wants Water in CA & Missoula, MT

Submitted by [SteveMT](#) on Tue, 01/04/2011 - 16:21 in [Current Events](#)

The Carlyle Group is just as huge as the better known Halliburton Company, and Water Rights have always been a big issue everywhere. Now, these two entities are being combined by this deal.

I expect water bottling export facilities to be quickly built at these three locations and this water to be sold overseas, similar to the pumping-out of the Great Lakes on JV's Conspiracy Theory. Who owns your water company? This purchase is a nightmare for Montana, IMO.

Missoulian: **Carlyle Group: Major player in defense, aerospace set to buy Mountain Water Co.**

By JENNA CEDERBERG
Sunday, January 2, 2011 6:15 am

At first blush, the pending purchase of the local water company in Missoula by the world's largest private equity investment firm seems unlikely at best.

The Carlyle Group, after all, is a major player in the world's biggest, most powerful industries - defense, aerospace, health care, real estate, financial services, transportation.

And then there is Park Water Co., a family affair that owns three relatively small water companies, including Missoula's Mountain Water Co. Park serves about 225,000 customers, about 50,000 of whom live in Missoula.

.....

And yet, Carlyle expects to close on the Park Water deal in about six months, pending approval by the California Public Utility Commission.

The Carlyle Group and Park Water Agree for Carlyle to Acquire Park Water

Park Water is located in Downey, California and provides water to southeast Los Angeles County. Park Water also owns two other water utilities - Apple Valley Ranchos Water Company in California and Mountain Water Company in Montana. Park Water and its subsidiaries provide water distribution to approximately 225,000 people through nearly 71,000 service connections. In Montana, the Mountain Water Company is located in Missoula, and is the largest investor-owned water company in the state serving nearly 50,000 people. Apple Valley Ranchos Water Company serves 65,000 people in Apple Valley and Victorville, California.

This is a grim reality, that makes me want to rebel now.

Submitted by [SteveMT](#) on Tue, 01/04/2011 - 21:18.

We are no different in this country. We are also servants in our own land. This water is ours, too. It lies right below our feet in deep wells. Missoula has excellent water. It's very pure, and it tastes great.

This video give a taste of the future to many communities facing the same ultimate issues of survival when the spigots are run dry or the water bills are too high to afford.

Thanks for the dose of reality, Michael. I'm sending this video to the people I know who live around and in Missoula.

We should cut funding to the Carlyle Group and FDA....

What's Soros going to do, send in the fleet of paid spies?

It is indeed but one sample of the network...

Submitted by [SimpleSam](#) on Wed, 01/05/2011 - 00:18.

And the Network originated, and got its official love-ammo in the Democratic party:

http://oneheartbooks.com/books/agenda/one_world_order_colema...

They were known as One World Communists. To this day a leopard like George Soros, Bush Senior or Kissinger haven't changed their spots.

One World Communists for one world government.....

A network that goes straight from George Soros, Carlucci and Lott straight back to William Buckley Jr, Damon Bernhard, Dick Cheney & Franklin Delanor Roosevelt himself.

"One World Democrats" **to this very day** have the same platform for the party.....Regulate and control all business to stop the "cats". Big Business controlled by government & merger with it. Top down control.

Exact opposite of a free market...

Soros is just the most public monster of the hydra because they control both parties leaders.

I have 100 acres in Ca that has an aquifer under it with the best water available in the world.They have secretly conspired to pump water that does not belong to them,It belongs to Mexico, from the Colorado River into our aquifer on one side only to pull out it on the other end and sell to LA.

I only know of this because I am doing work for the drilling company that is doing the strata assessment and they did not know it was to be a secret.

At this point our aquifer will now become a sand filter for those that choose to waste water everyday to keep their lawns green and wash their cars three times a week.

The question is what are they going to do when they have exhausted the last fresh drinking water supply in the area?

If they do not make priority decisions soon they will be living in tents and stealing your chickens out of your back yard in the next decade.

"It is better to get there slow than to not get there fast"

Submitted by [RawfoodLiberty](#) on Tue, 01/04/2011 - 18:26.

The exact opposite is permaculture. Like not filling in the Yangtze River Valley in China. And the decapitation mountain top mining. Our techno society must needs stop making decision's as if we live on a cardboard "monopoly" game. These centralist decisions, you know, if it's a resource, grab it now, or expand it now ... result in ... getting their too fast, and this disrespect for nature is causal for unnatural decisions.

We will figure this balance out, but as the days go by, we discover wherein lay the enablers of wierd detached decisions even temporary yet damaging ...

Inevitably, usurping the technocracy to do what will become "good" is the undeniable result of awakening, and can affect the conscioueness of the police state mindset, especially when we can name names instead of the constant, distracting phrases like "evil doers" or the all too easy, class warfar advertising.

As a humanity, we don't need more distractions.

Thankyou ATruePatriot for being true to your heart and sharing insights from a place of *being*.

Absolutely, I have been raising hell.They tried this about ten years ago,Some other owners and myself exposed one of the biggest county corruption situations in history.It turned out to reach all the way down to the dog catchers.

Now they are up to it again and Carlyle is behind it.Time to go bar hopping to their regular haunts again.It is amazing what a person will tell you if they get free drinks.

It's been another hard winter here in the U.S., and since the beginning of last year's Christmas season, we've heard a lot of warnings that cold weather would "cool" the North American public's urge to spend. When the nation's leading retail stores reported dour sales on their biggest shopping day of the year -- "Black Friday" December 26, 2010 -- the mainstream financial experts pinned the carrot on Frosty's face.
