North Coast Cooperative	Website	
Ocean Beach People's Organic food Co-op	Website	Genetically-engineered food makes the unsuspecting public subjects of an unregulated health experiment. It also threatens the entire organic food industry. This is one "genie" that can't be put back in its bottle.
One World Enterprises, LLC	Website	
Onesta Organics	Website	Our pet food company uses only certified organic ingredients. We use only two non-certified organic ingredients in our whole food-based pet food products, which are not available in certified organic form (e.g., calcium carbonate). Organic certification of pet foods requires that any included ingredient that is not available in certified organic form is verifiably not genetically engineered. We believe that industries including pet food manufacturers have the ethical responsibility to provide products that are safe and healthy for both pets and the environment.
Organic Valley	Website	We also urge everyone to tell the USDA "NO" on new untested genetically engineered corn that is being proposed.
Organically Grown	Website	

Company		
Ouiya Cuisine	Website	
Pastula Farms		Think of the children we already have trouble . Common Sense if its not working stop.
PCC Natural Markets	Website	PCC merchandisers sent letters to vendors in February 2008, saying that full disclosure of product ingredients is a standard they are expected to meet. We requested that the manufacturing community verify non-organic ingredients as non-GMO and identify GMO ingredients on the label.
Phil's Fresh Foods	Website	
Pilgrims' Produce
