The American Academy of Environmental Medicine (AAEM)

The American Academy of Environmental Medicine (AAEM) was founded in 1965 by a group of clinicians from various specialties who banded together and formed a medical society that has evolved into the American Academy of Environmental Medicine.

Our Mission

The mission of the American Academy of Environmental Medicine is to promote optimal health through prevention, and safe and effective treatment of the causes of illness by supporting physicians and other professionals in serving the public through education about the interaction between humans and their environment.
