## FAO/WHO Expert Consultations on GM Foods

FAO and WHO have embarked on an initiative to organize a series of scientific expert Consultations to provide scientific and technical advice to their Member States. The scientific advice derived from the Joint FAO/WHO Expert Consultations can be used by the Member States of FAO and WHO directly. It also serves as the scientific foundation for the work of the Codex Alimentarius Commission in their deliberation on risk analysis principles and safety assessment guidelines for foods derived from biotechnology.
