### Explosive Generation of Chaff

Authors: [I. M. Napier](#); [J. L. Thompson](#); [WEAPONS SYSTEMS RESEARCH LAB ADELAIDE \(AUSTRALIA\)](#)

**Abstract:** A new concept for the explosive generation and rapid dispersal of **chaff** for electronic countermeasures has been investigated. Promising results were obtained in static tests but these and theoretical estimates of radar cross section conflicted with the very low values actually obtained in experiments monitored by radar. Very short bloom times were realized in these experiments. (Author)
