## CHEMILUMINESCENCE IN ORGANIC COMPOUNDS

Authors: Heinz Stork; ARMY BIOLOGICAL LABS FREDERICK MD

**Abstract:** The energy of the radiation emitted in **chemiluminescence** originates from a chemical reaction; it may be interpreted as the reversal of a photochemical reaction: in the same manner as the radiation absorbed in a photochemical process will entail a chemical reaction, the analogous is true in reverse in the case of **chemiluminescence** where radiation is a consequence of a chemical reaction.
