Title:	Chemiluminescent gas-phase reactions involving electronically excited oxygen molecules - Trimethyl-aluminum and diborane near 3 mtorr.
Author(s):	Fontijn, A.; Vree, P. H.
Abstract:	Chemiluminescent gas phase reactions involving electronically excited oxygen molecules trimethylaluminum and diborane near 3 millitorr
NASA Center:	NASA (non Center Specific)
Publication Date:	Oct 1, 1966
Document Source:	Other Sources
No Digital Version Available:	Go to Tips On Ordering
Document ID:	19670032278
Accession ID:	67A11007
Publication Information:	JOURNAL OF PHYSICAL CHEMISTRY, Number of Pages = 2
Contract-Grant-Task Number:	NAS1-5035
Keywords:	ALUMINUM COMPOUNDS; CHEMICAL REACTIONS; CHEMILUMINESCENCE; DIBORANE; MOLECULAR INTERACTIONS; MOLECULES; OXYGEN; OXYGEN ATOMS; VAPOR PHASES; ALUMINUM COMPOUND; CHEMICAL REACTION; CHEMILUMINESCENCE; GAS PHASE; MOLECULAR INTERACTION; OXYGEN ATOM;
Notes:	AB/AEROCHEM RESEARCH LABS., INC., PRINCETON, N.J./.; JOURNAL OF PHYSICAL CHEMISTRY, VOL. 70, OCT. 1966, P. 3377, 3378. 9 REFS.
Accessibility:	Unclassified; Copyright; Unlimited; Publicly available;
Updated/Added to NTRS:	2006-11-06
