

Public Drinking Water Systems

The [Drinking Water Program](#) (DWP) regulates public water systems; oversees water recycling projects; permits water treatment devices; certifies drinking water treatment and distribution operators; supports and promotes water system security; provides support for small water systems and for improving technical, managerial, and financial (TMF) capacity; provides funding opportunities for water system improvements. For more about DWP activities, click on a link below. Private domestic wells are not regulated by DWP; the State Water Resources Control Board has [information pertinent to private domestic well water quality](#). For other CDPH water-related topics, [click here](#).

DWP is within the [Division of Drinking Water and Environmental Management](#).
