10,000s of Birds found dead in Manitoba

Sunday, January 02, 2011 9:33

Winnipeg Manitoba, Canada.

Officials from Health Canada are scrambling to deal with the sudden death of 10's of thousands of [wild birds](#) somewhere in the province. Officials dodged local reporters who were removed from outside the Level-4 Canada Science [center](#).

Local reports have circulated that an extremely virulent strain of bird flu has infected both wild and farm birds. At the same time an extremely aggressive winter flu has hit Canada sometime in December and mortality rates are expected to rise alarmingly in vulnerable populations.

Sounds like someone want to be sure that 2011 Flu season is profitable. This and the Arkansas falling birds makes me think someone is releasing something into the air.

Haarp all over again... u--- s wagging their big stick... birds first... you next. Who knows... coincidence... i do not think so.

Posted by dhuckler69 on Monday, January 03, 2011 7:42

Chemtrails check them out. Also the Big Pharma Corps. are ramping up another big "Bird Flu" Crisis. They want to give "Flu" shots. It seems more people are refusing them, so they have to create another crisis. To cash in on all the sheeple who believe the MSM.
