Shale Gas in Northern BC and elsewhere...

Encana's Horn River "Cabin Gas Plant" location

Posted on [April 29, 2009](#) | [Leave a comment](#)

Encana's "Cabin Gas plant" will initially process 400 Million cubic feet of natural gas per day. Encana Corp. has committed the first \$400 million investment and will expand the plant capacity as the Horn River basin is developed out and production increases.

Cabin gas plant

In addition to Encana's investment, TransCanada has committed \$340 million to building a pipeline from Horn River to Edmonton, and the BC government has committed over \$187 million to expand roads and traffic capacity making the Horn River more accessible and lowering overall costs for exploration

and development companies in the area.
