NEWPORT, R.I.

Navy readies site for drone development

By Associated Press | October 31, 2010

A new Navy facility for developing unmanned vehicles that can attack submarines is being built in Newport. A World War II-era building on Narragansett Bay will be converted into the Unmanned Anti-Submarine Warfare Support Facility as part of a \$6 million project. Groundbreaking was Thursday, and Navy officials expect the building to be finished by February 2012. ■
