C.A.R.E. Experiment

"...The C.A.R.E. experiment could also pave the way for future launches that would use the uppermost part of Earth's atmosphere as a large physics laboratory..." stated CARE's principal investigator, Paul Bernhardt of the Naval Research Laboratory in Washington, DC. New Scientist September 21, 2009

We will use chemicals, particles, and other schemes to stop direct sunlight from reaching the earth!

Let the public money flow and more experiments begin!

We don't need the public to know about our plans or have any oversight of our activities,

**WE KNOW BEST!**
