

David Suzuki: "Geoengineering is insane"

LEND THE MOVEMENT
A HAND BY GIVING US YOURS...

Welcome H.O.M.E!

Hands Off Mother Earth (H.O.M.E) is a global campaign to defend our one precious home, planet earth, against the threat of geoengineering experiments.

Join with us to send a clear message to the geoengineers and to governments worldwide that our home is not a laboratory

"We know what is creating our problem with climate and we know the best solution, which is to accept that mother nature, not governments or corporations sets the limits and we've got to meet those limits. Geoengineering is Insane." – David Suzuki, Candian Scientist, broadcaster and activist.

I thank you for this initiative. If we have learned anything from the past, it is that while we are very clever at inventing powerful new technologies, our knowledge of how the world works and is interconnected is almost zero. So we do things like explode nuclear bombs over Japan and then discover years later there is a thing called radioactive fallout, electromagnetic pulses of gamma rays and nuclear winter. We use DDT only to discover biomagnification years later when eagles begin to die off. We use CFCs and years later discover impacts on the ozone layer. The world is complex and tightly interconnected and our perturbations are alien impacts with enormous but unpredictable repercussions.

We know what is creating our problem with climate and we know the best solution, which is to accept that mother nature, not governments or corporations sets the limits and we've got to meet those limits.

That's the problem and that's the solution. How we do it, is each society's problem but nature dictates the conditions. But we impose our political jurisdictions and our creations like economics as the driving conditions to be fulfilled by any strategy. Won't work. So instead we find ways that will allow us to carry on as we are and as the problem gets worse

There are few scientists left in the world we can trust. Thank you David. YOU have been a Light through the hubris of what the geoengineers call science.

Thank you David for all you are doing. Say HI to Severn, my heroess.

Is there any discussions about chemtrails or the gov't sponsored aerosol spraying of the atmosphere ?

J F Kennedy did more atmospheric tests than any other president, watch who you trust, idolize and praise. The portrait/picture on this page out shadows the type!
 A statement on a webpage is one thing but will he question the current spraying over Canada so many have video taped blocking the sun? he has never been equally critical of the airlines regarding fuel dumping or exhaust. I trust nothing he says as long as corporations and tax dollars pay his comfortable life. Many are watching what he really will do to stop the experimentation over all humans on earth. He could be on the CBC getting all environmental this week on the issue if he really cared about the planet and us. Does Pembina fund David Keith (Calgary geoengineer) as well? look into that.

Here we have the same old story, Dave is great because he doesn't believe in Geo-engineering but believes the fraud Al Gore who was taken to court and lost in the U.K. . Please do yourself a favor if you still believe in "Global Warming" at least take the time and look at the facts yourself and compare the temperatures from years past to today, you WILL FIND the temperature has been decreasing over the years and not rising. Why is it cooler now than in the bronze age? Did they put out more CO2 back then? Again see http://climate.weatheroffice.gc.ca/climateData/generate_chart_e.html?Prov=XX&timeframe=1&StationID=1750&Type=line&MeasTypeID=temp&Month=3&Day=3&Year=2007&cmdB1=Go and see for yourself.
