**"Environmental modification techniques"** refers to any technique for changing - through the deliberate manipulation of natural processes - the dynamics, composition or structure of the Earth, including its biota, lithosphere, hydrosphere and atmosphere, or of outer space. ([Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques](#), United Nations, Geneva: 18 May 1977)

**"Environmental warfare"** is defined as the intentional modification or manipulation of the natural ecology, such as climate and weather, earth systems such as the ionosphere, magnetosphere, tectonic plate system, and/or the triggering of seismic events (earthquakes) to cause intentional physical, economic, and psycho-social, and physical destruction to an intended target geophysical or population location, as part of strategic or tactical war." (Eco News)

In 2007, following the release and declassification of British government papers from the National Archives, the Daily Express reported:

*"The [declassified] documents reveal that both the US, which led the field, and the Soviet Union had secret military programmes with the goal of controlling the*

world's climate. "By the year 2025 the United States will own the weather, " one scientist is said to have boasted...

These claims are dismissed by sceptics as wild conspiracy theories and the stuff of James Bond movies but there is growing evidence that the boundaries between science fiction and fact are becoming increasingly blurred. The Americans now admit that they invested L12million over five years during the Vietnam war on "cloud seeding" - deliberately creating heavy rainfall to wash away enemy crops and destroy supply routes on the Ho Chi Minh trail, in an operation codenamed Project Popeye.

It is claimed that rainfall was increased by a third in targeted areas, making the weather-manipulation weapon a success. At the time, government officials said the region was prone to heavy rain. ([Weather War?](#), Daily Express, July 16, 2007)

Michel Chossudovsky writes, "The possibility of climatic or environmental manipulations as part of a military agenda, while formally acknowledged by official government documents and the US military, has never been considered relevant to the Climate debate. Military analysts are mute on the subject. Meteorologists are not investigating the matter, and [environmentalists are strung on global warming](#) and the Kyoto protocol." (Michel Chossudovsky, [Environmental Modification Techniques \(ENMOD\) and Climate Change](#), Global Research, December 5, 2009; Also see D. Dupre, [A gory truth about climate change mind control](#), Examiner, December 6, 2009)
