Bunzl, Martin

Martin Bunzl | Curriculum Vitae

Professor I

Director, Rutgers Initiative on Climate Change and Social Policy

Contact Information

Office: Eagleton Institute of Politics

Email: bunzl@rutgers.edu

Phone: (732) 932-9384

Education

B.A., University of Minnesota; Ph.D., University of Minnesota

Speciality

Philosophy of Science

Research

The current focus of my research lies at the intersection of the philosophy of science and climate change policy. To learn more please go to <http://www.bunzl.org>

(Asilomar Private Geoengineering Conference March 22-26, 2010 Monterey, California)

Other leading scientists, however, have chosen to skip the conference, including Stanford's Ken Caldeira, **Martin Bunzl**, who directs the Rutgers Initiative on Climate Change and Social Policy, and **Braden Allenby**, a professor of Engineering and Ethics at Arizona State University, both of whom participated in a lively panel on geoengineering at the AAAS annual meeting in February. Bunzl told Climate Watch Senior Editor Craig Miller that the five-day event was too much time to devote to the topic, and Allenby called the conference premature. (Quote from Climate Watch – March 21, 2010)
