

Climate Scientist: Manipulating Earth's Climate Will Not Cost Taxpayer More than \$1 Billion... Annually!

David Keith, director of the Institute for Sustainable Energy, Environment and Economy, has proposed releasing engineered nano-sized discs in the earth's atmosphere to "offset global warming"- and that for just \$ 1 billion of your taxpayer-money *annually*.

"You could manipulate the Earth's climate at large scale for a cost that's of the order of \$1 billion a year. It sounds like a lot of money, but compared to the costs of managing other environmental problems or climate change, that is peanuts.", **Keith told Nanowerk News.**

Keith also made clear that mentioning the annual cost is not necessarily an argument pro or con, but an "indication" rather, "that risk, not cost, will be the deciding issue."

Until now, scientists have mainly looked at injecting the volcano-mimicking sulphur dioxide into the upper atmosphere as a way to "get the maximum cooling benefit." This new nano-particle proposal of spraying "levitating" engineered nano-particles in the atmosphere might have serious drawbacks, Keith acknowledges:

"A downside of both these new ideas is they would do something that nature has never seen before. It's easier to think of new ideas than to understand their effectiveness and environmental risks."

On the upside, Keith says:

"(...) the distribution of engineered nano-particles above the Earth could be more controlled and less likely to harm the planet's protective ozone layer."

The risks that Keith is willing to take with the earth is illustrated by a speech he gave for TED (Technology, Entertainment, and Design). Other speakers for TED have included Al Gore, Hans Rosling and Sir Ken Robinson:

“We could make the particles migrate to over the poles (...) which would have minimal bad impacts in the mid part of the planet, where we live, and do the maximum job of what we might need to do which is cooling the poles in case of planetary emergency, if you like.”

“The one thing about this”, Keith states, “is that it gives us extraordinary leverage, this.. this improved science and engineering will- whether we like it or not- give us more and more leverage to affect the planet, *to control the planet*, to give us weather and climate control- not because we plan it, not because we want it, just because science delivers it to us bit by bit. With better knowledge of the way the system works and better engineering tools to affect it.”

Control of the planet, no less, and at a minimal expense for the taxpayer- if you call \$ 1 billion a year minimal.

By all means Keith tamper with the atmosphere some more you idiot. Just exactly how do you propose to modify the sun's behavior and the temperature of the oceans?? These are the only things that control the weather for the most part.

Quotation by MARK OF THE BEAST:

"These are the only things that control the weather for the most part."

Which is it? The sun and the ocean temperature are the only things that control the weather or they are not the only thing that control weather? You've claimed both in one sentence. Hint: the sun and the ocean temperature are not the only factors in weather.

"Chemtrails" is a slang term, and when you enter chemtrails into a search engine, you will get a couple of reliable sites, but most of the search engines' results are websites comprised mostly speculation, hypotheses, guesswork, or outlandish kook stuff.

Once you find the right establishment "buzzword" and enter it into a search engine using Boolean operators (or the "advanced search" function), you will uncover so many white papers, scientific studies, and policy reports, on "chemtrails" your head will spin.

The buzzword in this case is "geoengineering" or more specifically "climate geoengineering"

Here are some more "buzzwords" or phrases to find more PDFs on chemtrail phenomenon:

Copy and paste the following phrases exactly how they are, and put them into a search engine: (I used google, yahoo, and bing, and each search engine found different pdfs)

"climate geoengineering" filetype:pdf

climate geoengineering filetype:pdf

"solar radiation management" filetype:pdf

inject atmospheric aerosols filetype:pdf

"aluminum oxide" climate filetype:pdf

"aluminum oxide" particles filetype:pdf

"mount pinatubo" climate filetype:pdf

You can also find PowerPoint Presentations too, just change the input for the boolean operator to PPT. For example, copy and paste the following into a search engine:

climate geoengineering filetype:ppt

The first result I had when I put that phrase into Google was a PPT from NASA "science talks", where they "explore" the possibility of climate geoengineering, with the disclaimer they have no intentions of doing it, but they do cite studies where geoengineering experiments have been done.

I highly recommend downloading these PDFs, and burn them to CDs, printing them, or storing them on a separate server, because they do get taken down! I don't like tooting my horn, but I have blown some of the biggest documents cited in the truther/patriot community before, and they disappear quick from the original source. Luckily, facsimiles of those documents are still circulating around the four winds of the world wide web, thanks to people reposting! I couldn't give two hoots about taking credit, because I just want the information out there, because I want to expose and crush the NWO scum so bad, as that is my only purpose in life.

I'm still sifting through all of this data, but from the puzzle pieces that I have found, there is a NASA connection, Rutgers Climate Lab connection, Hughes Aircraft Company (which has been acquired by Raytheon and Boeing) connection, a Lawrence Livermore Laboratory connection, a Berkley connection, a UN IPCC and East Anglia connections, a FAS connection, a CFR connection, a Royal Society connection, and many more connections to list.

I am going to sift through this data, with all of your guys' help, and try to connect the dots. Eventually, we can name names, and find out who is responsible for the chemtrail mess, so we can hopefully have them prosecuted for conducting unethical studies against unwilling participants.

THE CHEMTRAILS WILL STOP, THE SAME WAY THE REDFLEX PHOTO RADAR CAMERAS WERE TAKEN DOWN ARIZONA! WE WILL DEFEAT THESE CLIMATE SCIENTIST SCUM!

You are twisting what he said.

It seems obvious (to me) that what Mark intends to communicate is that the sun and ocean temperatures account for MOST... not all.

sure he says "only" and "for the most part". It is like saying "I'll be there at about 3 o'clock". Grammatically, it is incorrect to say "at about", but the intent of the statement is not lost to most intelligent people.

I am not defending the factuality of Mark's statement (because I haven't looked into it myself). I am only pointing out your making a banner/bullet point out of something that is quite trivial.

In the following links there is finally incontrovertible proof that the atmosphere is radiatively heated from the top-down by incoming electromagnetic radiation from the Sun. This fact destroys the "Greenhouse Effect" hypothesis which stipulates, bottom-up atmospheric heating via outgoing infra-red.

"The Diurnal Atmospheric Bulge, giant 1200° bulge of rapidly heated and expanding gases circling the Globe 24/7."

"Diurnal Atmospheric Bulge, incontrovertible evidence of massive top down radiative heating. "

jaspen Reply:

This is a total fabrication.
They activate H.A.A.R.P. installations from Alaska, Texas and Costa Rica and then begin their study so what do they get, FALSE READINGS because as soon as HAARP was turned off the temperature went back into the area where it is supposed to be.
These Institutes and their " scientists" were getting fabricated readings from H.A.A.R.P. and they damn well knew it.

It's a total lie ! Keep researching it and you will eventually get to the bottom of it.
The DIURNAL ATMOSPHERIC BULGE farce. IT'S GETTING COLDER UP THERE NOT WARMER !!
What a load of crap.

Politicians cost lives Reply:
September 8th, 2010 at 5:41 am

Obviously you have missed the point entirely.

That could be because you haven't read or understood the links I have provided or that you have no idea about the "greenhouse effect" hypothesis which requires that the atmosphere, 99% O2 and N2 must be practically transparent to incoming electromagnetic radiation.

The Diurnal Atmospheric Bulge simply shows that the main premise of the greenhouse effect is false.

I doubt very much that H.A.A.R.P. could heat an area of atmospheric gases with a circumference equal to 25% of the entire atmosphere, to temperatures of 1200+ degrees causing the atmosphere to bulge up 600 km above the night time atmospheric altitude, such as the sun does **top-down**.

The main premise of the "greenhouse effect" is that the atmosphere is entirely heated bottom-up from absorption of outgoing IR by 0.0385% CO2 and is practically transparent to incoming electromagnetic radiation.

If you want to gain a better understanding of this, I suggest you read thoroughly the information I have provided at both links.

This doesnt quite make sense.

First of all there are spurious claims that mankind is changing the climate and that we must pay taxes to the IMF to save the planet [sarcasm] but then the same idiots claim it will only cost 1 billion to manipulate the climate in response to the junk science and spurious claims about AGW.

There seems to be a conflict here.

AGW = BAD

Geo-engineering = GOOD

CO2 = VERY BAD

Engineered NanoParticle Discs = DOUBLE PLUS GOOD

Why not try not manipulating the climate at all which would cost 0 billion \$ therefore saving 1 billion of taxpayers cash to fund these stupid ideas from the lunatic fringe ?

I am very tired of these lunatic control freaks and they need locking up and who wants the atmosphere polluted with their nano-particle s--- ??

These Morons need reminding that its not just their planet .

Definately a NWO-Club Of Rome etc SHILL but to be fair he does at least acknowledge that there are risks involved so he isnt a complete basket case although i have only read the article so i dont know what his definition of risks are.

It's not like they haven't been doing this for 20 years already. What in the blue hell do you people think Chem Trails are? This guy is just part of the propaganda machine.

Let me break it down to you this way-

The NWO -Illuminati have always been able to push an idea into the publics eye and in the past if it was said or seen over and over, whether it was true or not, it would eventually be accepted as truth by enough of the " common" folk, better known as sheeple,(thank you Bill Cooper for coming up with the correct phrasing for the idiot masses) that nothing would be done about the lie publicly.

Well that is just not working as well as it used to.

People are now hearing this garbage and just getting angrier and angrier at the constant barrage of lies being spewed out by the government controlled main stream media and their masters in the CFR and the Tri- Lats(not to mention the German, British and U.S. Illuminati).

They listen less to what they say as to watching what they do. They are losing control because they are almost at the end of their reign.

Unfortunately, they firmly believe in the "scorched Earth" theory. The Gulf oil spill is a prime example of that. Yeah, accident my ass, and 911 was carried out by 19 Muslim terrorists who couldn't even get a license to fly a paper airplane, much less a commercial airliner. Give me a break.

Look, the next time a Democrat or Republican politician tells the truth about something, it will be the first!

The message here is climate manipulation is cheap and also because -

"Science delivers it to us bit by bit" - lets do something totally unnecessary just because we can.

"Not because we want it" - It doesnt matter what you or we want. To hell with all that we are going to do it anyway.

"Will wether we like it or not - give us more and more and more leverage" - Wether you like it or not the use of Geo-engineering programmes is a forgone conclusion.

"Just because science delivers it to us bit by bit" - Technology justifies its own existence despite there being no need for it.

The truth is that global green house gasses are much more dangerous than everyone realizes. The amount of CO2 in the atmosphere has never been this high since the age of the dinosaurs which is great if you are a reptilian (hey maybe they will come out of their caves and finally say hello). So don't tell me we are not affecting the planet. The only thing fighting global warming right now is air pollution – the small microscopic particles of dirt we are all spewing up into the atmosphere. This causes water vapor to accumulate on the particles and then form water droplets and then clouds. This is what the scientists want to do with their own particles – a practice used by countries like Israel for decades to cause rainfall. Google cloud seeding. The result is less sunlight penetration which lowers the amount of heat energy to the planets climate. I hear you asking for proof – since the 1800's the british empire has taken evaporation tests in a standardized round pan full of water in all of it's overseas countries around the planet. The more the pan evaporates from the sun the more sunlight energy available in that part of the world. Well guess what, the pans around the world have lost 10% of their sunlight due to increased cloud formation in direct correlation to airborne pollutants(the other theory is that the sun has lost 10% of it's burn ha ha ha ha). Ask yourself why the average temperature rose dramatically across north america when there where no planes flying after 911 and then dramatically went down when planes flew again. This is because chem trails are due to increased efficiency of jets burn and allow smaller particles to stay airborne and cause cloud seeding – which never happened with the older chunkier particles that fell to earth. If we were to stop air pollution today then the temperature would rise even more and their solution is to make this planet covered in clouds just as long as we can still burn oil and coal. What a bunch of retards our oil and bank controlled governments are. It just goes to show how much information we are allowed to see and what is actually happening. Cloud seeding should be made illegal as we are just making things worse than they already are. Please do some research on the internet before deciding I am wrong.

Thanks.

"And remember, where you have a concentration of power in a few hands, all too frequently men with the mentality of gangsters get control. History has proven that. All power corrupts;

absolute power corrupts absolutely. Great men are almost always bad men."
"The issue which has swept down the centuries and which will have to be fought sooner or later is the people versus the banks."
