Explore geoengineering's most interesting strategies with

By *Jeremy Singer-Vine*

Posted Friday, Sept. 24, 2010, at 6:37 PM ET

This piece arises from Future Tense, a collaboration among Arizona State University, the New America Foundation, and **Slate**. A Future Tense conference on geoengineering will be held at the New America Foundation on Monday, Sept. 27. (For more information, please visit the NAF Web site.) Read more of **Slate's** special issue on geoengineering.

Schemes to mitigate or reverse climate change by "hacking the planet" range from the proven to the fantastical, from the careful to the downright imprudent. To help you get a handle on what's been proposed so far, **Slate** presents an interactive exploration of the most-discussed forms of geoengineering.

The following interactive is best viewed in browsers that support HTML5, including recent versions of Chrome, Firefox, Safari, and Opera, as well as Internet Explorer 9.
