Choose Your Own Geohack

Explore geoengineering's most interesting strategies with **Slate's** interactive guide.

By *Jeremy Singer-Vine* Posted Friday, Sept. 24, 2010, at 6:37 PM ET

ASU | NEW AMERICA | SLATE

This piece arises from Future Tense, a collaboration among Arizona

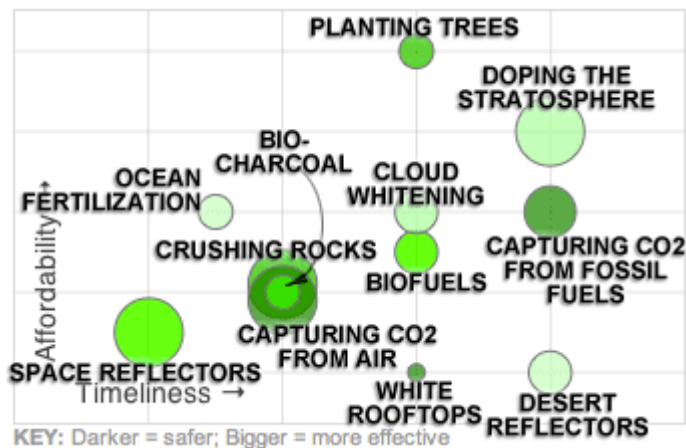

*State University, the New America Foundation, and **Slate**. A Future Tense conference on*

geoengineering will be held at the New America Foundation on Monday, Sept. 27. (For more

*information, please visit the [NAF Web site](#).) Read more of **Slate's** special issue on geoengineering.*

Schemes to mitigate or reverse climate change by "hacking the planet" range from the proven to the fantastical, from the careful to the downright imprudent. To help you get a handle on what's been proposed so far, **Slate** presents an interactive exploration of the most-discussed forms of geoengineering.

The following interactive is best viewed in browsers that support [HTML5](#), including recent versions of Chrome, Firefox, Safari, and Opera, as well as [Internet Explorer 9](#).

3. Explore the strategies, ranked according to your preferences.

PLANTING TREES

BIOFUELS

CRUSHING ROCKS

CAPTURING CO² FROM AIR

OCEAN FERTILIZATION

WHITE ROOFTOPS

DESERT REFLECTORS

CLOUD WHITENING

DOPING THE STRATOSPHERE

SPACE REFLECTORS

CAPTURING CO² FROM FOSSIL FUELS

BIO-CHARCOAL
