Peter,

The Division of Drinking Water is not involved in this issue but I am copying the Division of Water Rights for their consideration.

Hi Cindy,

The Russian River Flood Control District is requesting a change petition from the Water Board to reduce out-flows from Lake Mendocino by 50 ac/ft per day. The district is concerned, as each passing day means 50 acre feet that won't be available for later use. Can you assist with a timeline projection for the change petition?

Thank you,

Peter Crase
