Fox News: "U.S. is receiving a steady flow of radiation from Fukushima" — Media paying little attention to radiation in food, as if problem only involves Japan

June 29th, 2011 at 08:40 PM

51	40	50	3	144
		Reddit	Email	Share

[Radiation in Our Food](#), Fox News by Chris Kilham, June 29, 2011:

[...] Milk, fruits and vegetables show trace amounts of radioactive isotopes from the Fukushima Daichi power plants, and the media appears to be paying scant attention, if any attention at all. It is as if the problem only involves Japan [...]

Radiation tests conducted since the nuclear disaster in Japan have detected radioactive iodine and cesium in milk and vegetables produced in California. [...] Milk sold in Arizona, Arkansas, Hawaii, Vermont and Washington has also tested positive for radiation since the accident.

Additionally, drinking water tested in some U.S. municipalities also shows radioactive contamination. Is the fallout from Fukushima Daichi falling on us? Yes, it is.

Thanks to the jet stream air currents that flow across the Pacific Ocean, the U.S. is receiving a steady flow of radiation from Fukushima Daichi. [...]

What we focus on is not only the level of radiation: a quiet lesson.
Peng Zhang, Doctor

Yanlei Ma; Jiayuan Peng; Zhihua Liu; Huanlong Qin

The Sixth People's Hospital Affiliated to Shanghai Jiao Tong University, Shanghai 200233, China

As the radioactive material from Fukushima nuclear power plant continues to flow into the sea, marine life will be threatened; as Becker SM said: the situation in Japan reminds us that the radiation emergency is international[1]. Till now we do not know much about the impact of radiation on the water, the higher the concentration of radioactive material, the greater the potential harm. While the radioactive waste continues to release, it will pose greater threats to marine life. After all, Fukushima is not Chernobyl, we cannot build a concrete shell to enclose the whole region of the coastline.

Radiation is always there, and all life on land and sea is exposed to ...

Heebie-Jeebus—
I recommend a healing Musick for you, and All...

it is Felix Mendelssohn's
"Elijah" oratorio...
hope you are more of an aficionado of choral music,
than you are of Spiritual things...
this music will wake you or Bake you.
Please Acquire for yourself the Atlanta Symphony recording,
directed by Robert Shaw.
You cannot instruct me about religion, Heebie-Jeebus.
I got to audition and sing the high-tenore choral parts
on this monster of a musical healing blessing.
I recommend having a Bible opened to the appropriate
parts of the Elijah/Elisha/Ahab/Jezebel story.
Damn the Devil, Sir.

Jebus
[June 29, 2011 at 9:15 pm Log in to Reply](#)

@Elenin
I am old enough and wise enough to know that you can not instruct an expert on the personal interpretation of Man's many incarnations of religion...
And please do not bore me with your "taste" in music...
There is only Rock and Roll...)

According to the U.S.-based group of medical doctors Physicians for Social Responsibility (PSR), no amount of man-made radiation in water and food is safe. "There is no safe level of radionuclide exposure, whether from food, water or other sources, period," said Jeff Patterson, DO, immediate past president of PSR, in late March. "Exposure to radionuclides, such as iodine 131 and cesium 137, increases the incidence of cancer. For this reason, every effort must be taken to minimize the radionuclide content in food and water."

Doctor Alan Lockwood MD echoes this. "Consuming food containing radionuclides is particularly dangerous. If an individual ingests or inhales a radioactive particle, it continues to irradiate the body as long as it remains radioactive and stays in the body."

"Children are much more susceptible to the effects of radiation and stand a much greater chance of developing cancer than adults," states Andrew Kanter, MD, president of PSR's board. "So it is particularly dangerous when they consume radioactive food or water."

Should you panic about this? No. That will do no good. But you can call, write and email your congressperson, your senator, and any other elected officials in your district, ask them to push for testing of foods and water in your area, and tell them to take the threat of global nuclear fallout seriously. For while none of the 104 nuclear power plants in the U.S. are melting down at present, we have had our own nuclear accidents. Remember Three Mile Island? Radiation has made its way to the American dinner table. This is a time to speak out, and to put pressure on policy makers. Clearly, it's far better to be politically active now than radioactive tomorrow.

I don't know how much more clearer it can be stated...

i got into a dispute in the uk recently
about products from japan.

i wanted to return them stating that i did not trust the japanese government.
that i believed food was dangerous and i wanted my money back.

i was told by wholefoods store head office that they do 0 testing it is done by clearspring.
i contacted clearspring they said we do no testing but we source are produce from the safe parts of japan :)
and also if we had a problem the uk government would not allow us to sell bad products..
this is from 2 companies that sell a lot of organic stuff.
the higher end of the food market.

moral being nobody cares,they want your money who cares if you die from cancer in 10 years.

WTH? Huffer just posted this. I'll repost in FULL:
Ft. Calhoun NOT evacuate. There was a video making the rounds from the ABC station in Lincoln NE that claimed a 10 mile zone Ft. Calhoun had been evacuated. It certainly sounded legit, they even had a sound bite from the head of the NRC stating it was. When no other media outlet or witnesses confirmed the story I emailed KLKN TV. Below is the response:

Hi Nancy,

To answer your question, there is no evacuation in the Fort Calhoun nuclear plant area. The information was incorrect and we corrected it on our news yesterday, (June 28th). The 10-mile evacuation has not taken place, it is only a plan by the NRC should conditions become critical at the plant.

Thanks,
Linda Van Hoosen
KLKN-TV Assignment Manager

A reasoning voice is sometimes needed and you just gave one. thanks

milk and cheese
[June 30, 2011 at 6:19 am](#)
That is a very wise course of action. Even if I had the regulation gas masks and hundreds of drums of pre-Fukushima water stored (instead of just two, and a modest store of food) I would not want to live a paranoid and irradiated life. Besides, what about my friends that I could not help? It's not worth it.

irradiated californian
[June 29, 2011 at 9:26 pm](#) [Log in to Reply](#)
MSM is reporting what we know. it makes no difference at all. there is no need to panic just because they are reporting the obvious, it just goes to show you that they can't hide it, but they knew it all along. i don't understand how so many of you (including myself) are critical of MSM like fox news, cnn, etc. yet when something like this pops up most of you act like it is new, and say stuff like 'omg, god help us, this isn't good, etc.' that makes you sound just as bad as the sleeping sheep. we know this already, we knew it from the beginning, so quit fooling yourselves

into thinking that this report makes it any worse. even if the masses know about this, they still aren't going to do anything about it.

Whoopie
[June 29, 2011 at 9:30 pm](#) [Log in to Reply](#)

You are SO RIGHT. They give us 'scraps and bones'...and we BITE. No truer statement than that. I think we're all in KNOTS. Nothing, like you said, will change the fact that the entire MSM has been slow on the draw. Our emotions take over and that's "all she wrote". ff your comment because it's so true. Scraps and bones is all we're going to get from here on. FUKASHIMA is a life changing event. There lies THE RUB.

alasanon
[June 30, 2011 at 12:39 am](#) [Log in to Reply](#)

I think it can be overwhelming when your opinions have been somewhat officially validated. The biggest concern for me is for others—many, many others! There are millions & millions of wonderful, innocent people who can be adversely affected by this and they don't even know it!! I think that's what bothers you as well, Whoopie! 😊
(I'm not too worried about myself. I tend to survive anything and everything.)

jump-ball

June 29, 2011 at 10:02 pm [Log in to Reply](#)

As soon as I determine how to measure food radiation, I'll order the detector, and after it arrives I'll be paying a lot of attention to radiation in food, and reporting the bad news regularly.

I didn't buy 10 cases each of long-dated (2016) canned tuna and salmon and other pre-Fuku Pacific seafood, along with canned fruit and vegetables, and rent an AC'd storage unit to hold it all, because of my confidence in any of the u.s. agency cabals such as the epa, or in the msm to do honest reporting.

It's a two-sided attack: a steady flow of radiation from Japan, and a steady flow of toxic bullsheedium from authorities and news sources all around.

txphysicist

June 29, 2011 at 11:08 pm [Log in to Reply](#)

I just received a CDV-700 in the mail and I've been out measuring over the last few days. So far, just showing 0.01 – spiking 0.1+ mRem/hour here in South Texas.

Did find a 0.2mRem/hour june bug... That was kinda funny, but not found any hot particles in the old a/c filter, so hoping it can stay that way for a while.

alasanon

June 30, 2011 at 12:43 am [Log in to Reply](#)

Thanks for the update!! TX and Mexico are looking pretty rosy, as yet... I like their food...would wind currents from Los Alamos go down that way? Need those Fairewinds!

Lee Binder

June 30, 2011 at 12:48 am [Log in to Reply](#)

what made you purchase the CDV-700 (vs. e.g. the Detector Inspector)?

lokay5

June 30, 2011 at 1:10 am [Log in to Reply](#)

I've had a couple CD 700bs for a few years. Bought 'em before our trip to NNTS. I've checked out Durango's air filter from day one untill today, and I haven't detected anything. I'm in Southern Oregon.

Lee Binder

June 30, 2011 at 1:32 am [Log in to Reply](#)

Do you consider it possible that you might have detected radiation with a highly sensitive device like the Inspector Detector? Isn't the CDV-700 less receptive?

westcoastgirl

June 30, 2011 at 1:19 am [Log in to Reply](#)

Just wondering...how much is 0.01 or 0.01 mRem/hr? It sounds fairly minimal...am I right?

lokay5

June 30, 2011 at 4:04 am [Log in to Reply](#)

Lee

I've had these CDV-700B's for a few years just as a novelty. They were cheap then. I took one on the Los Alamos tour to Ground Zero and got pretty good readings on some fragments. There was also a display with DU and it went crazy!

Pu239

[June 30, 2011 at 1:58 am](#) [Log in to Reply](#)

Wondering how you go about detecting hot particles in a filter, or in a plant leaf?

I think for plants you need an autoradiograph? [radiograph?].

I gather that detecting hot particles in filters can't be done with a Geiger counter, and testing is very difficult and expensive. Is this correct?

lokey5

[June 30, 2011 at 4:07 am](#) [Log in to Reply](#)

I had an AutoRadioGraph in my '50 Olds. It played 45's.....;>)

Rica E

[June 30, 2011 at 5:41 am](#) [Log in to Reply](#)

Here is a guess, I think if you have an accumulation like water or air filters, or swab your windshield after bad air quality day with a damp paper towel, the decaying thingy's should give a noticeable reading.

Keys

[June 29, 2011 at 11:19 pm](#) [Log in to Reply](#)

I would never have guessed the same station that gave us Anne Coulter's "Radiation is good for you" bs would publish something so close to the truth about the catastrophe at Fukushima.

Keys

[June 29, 2011 at 11:21 pm](#) [Log in to Reply](#)

accumulation is the killer

BetaFlare

[June 30, 2011 at 6:57 am](#) [Log in to Reply](#)

Most dangerous accumulation point: lungs.

Measurement Note: cheap gauges are just indicating devices; better than nothing but dont bet your life on the radings...

And i've heard constant low doses is much worse than one large dose since your body never has a chance to recover.

Erhyth

[June 30, 2011 at 12:26 am](#) [Log in to Reply](#)

The radiation in the food and water here is hardly just from Japan...but Japan has become a convenient scapegoat and cover-up for already existing home-grown radiation.

Jebus

[June 30, 2011 at 12:50 am](#) [Log in to Reply](#)

Erhyth,

You are absolutely correct and no one here is saying that it is.

We have been adding to the mix since the first test at trinity.

Which validates Keys comment, "accumulation is the killer"

We as humans are at a apex point in regards to all poisons produced from the business of nuclear fission.

If we, this generation, at this moment in time, fail in stopping this monster to humanity, then our children and all life that comes after us will suffer the worst possible fate.

We will be accessories to the murder of all life on earth.

You must be [logged in](#) to post a comment.
