Following is a translation from an original Youtube uploader's writeup:
 This video was created based on the simple analysis of the current state of the Fukushima Nuclear power plant by media artist Kazuhiko Hachiya (@hachiya on twitter) or <http://togetter.com/li/111871>

Neither Mr. Hachiya nor video creator is an expert on the subject, and we advise you to obtain accurate information from the Tokyo Electric Power Company.

My thoughts and prayers are for those affected by the disaster. And for us living outside of an affected area, should not take irrational action based on unofficial reports.

We're hoping for everyone's quick recovery so more people can have a smile.

Respond to this video...

I don't think tht this is the right way to explain the nuclear crisis to children.
