They shouldn't be concerned about what's IN the fluoride from China, don't import any of it, quit adding fluoride to ANY water, the evidence is in, it doesn't help your teeth it harms them as well as your bones and many other metabolic activities in your body. Total junk science, never approved by the FDA yet millions of people are drinking this poison...wonder where all our health problems come from? Start with the water and foods/drinks made with it.

Too bad it's added to most of our foods now to. Fluoride is why people won't do squat about it.

NewWorldReport 15 minutes ago

Fluoride is a traditional rat poison. In water it ends up in too many products and accumulates in your body. Seems like the medical industry wants to keep us ill and paying while the government wants us to die off before collecting too many entitlements.

The most insane thing is that they are adding sodium fluoride to the water in the first place yet no one bats an eye lid. Sodium fluoride is just as toxic as lead at the same levels, yet no-one bats an eye lid. Fucking sad.

The Chinese fluoride poison is a safe good toxic poison and has been certified as being safe so drink up and be happy your drinking 'good' poison as opposed to other 'bad' poisons! We are living in an insane world people! wake up

[@Silverpup67](#) They also have those same warnings on toothpaste : do not ingest , call poison phone line if swallowed etc.

Thankfully you can buy fluoride free toothpaste these days.

[@badattitude77769](#) The truth is, they want pure fluoride. That's how stupid people are.
