Organization

VISION:

"Free exchange of accurate information regarding the efficacy,
safety, methodology and cost-effectiveness of weather modification
activities."

MISSION:

"Enabling persons, political entities, and other organizations to make
informed decisions about the application of weather modification
technologies, to provide for adequate water supplies, and reduced
natural weather hazards."

The Weather Modification Association (WMA) was organized in 1950 to cultivate a better understanding of weather modification techniques, impacts, and expectations among sponsors, program operators, and the scientific community, and to promote ethical professional conduct and a free exchange of information.

Weather modification can be both planned, as is the case in cloud seeding (cloud modification), or inadvertent, for example, when pollution affects visibility.

Planned (deliberate) weather modification is also commonly known cloud seeding, cloud modification, and atmospheric water management.

The WMA fields a wide variety of inquiries, from domestic and foreign governmental agencies, to the student doing a report for the classroom.

If you cannot find the information you are seeking on this site, please contact us at wxmod@comcast.net or wxmodclouds@gmail.com. As well, we can be reached by mail or phone.
