Cloud seeding public forum Wednesday night

M. Kate West
Chester Editor
5/25/2011

The Almanor Basin Watershed Advisory Committee (ABWAC) is hosting a community forum tonight, May 25, on PG&E's cloud seeding operations in the Lake Almanor Basin.

The forum will be held in the new Almanor Recreation Center, which is located at 45 Meadowbrook Loop, next to the Truman Collins Sports Complex.

The forum is scheduled to begin at 6 p.m. and conclude by 8:30 p.m.

The forum will be facilitated by ABWAC chairman Ryan Burnett and watershed coordinator Creeley.

Creeley has advised there will be a number of agency representatives on hand to respond to questions and provide information regarding the practice and purpose of cloud seeding, public health, air quality and regulatory oversight.

As of May 20, Creeley said the confirmed forum speakers include Don Griffith, North Plumas Weather Consultants, who will discuss cloud seeding, how it works and the studies on cloud seeding.

Speaker Byron Marler, PG&E meteorologist, will specifically discuss the Lake Almanor Basin operations.

Creeley said additional scientists are still being confirmed for attendance.

In addition to the speakers, several experts in water quality and regulatory oversight will be on hand to answer questions.
