Alternatively you can **[follow this link to place an order at the LAADS Web Site](#)** (please be patient) for these files and other MODIS products corresponding to this granule, including level-2 atmosphere products. Note that recent granules processed by the Rapid Response System may not be processed by LAADS yet.

Please be aware that the Collection 5 data from LAADS use internal HDF compression. This will be transparent when using most HDF utilities, except, perhaps, for longer execution times.
