3. Download and manipulate SDWIS/FED data in MS Excel PivotTables®

Access aggregated information on all violations reported in an EPA region, state, and county since 1993 using the MS Excel PivotTables®. These multidimensional tables contain aggregated information on water systems; violations reported by violation type and by contaminant/rule, and GPRA data, for each year since 1993; and current Envirofacts data. Sort, categorize, and analyze the data across several dimensions.

4. Read the annual [Consumer Confidence Report](#) (also called a water quality report) published by your public water system. Each year by July 1st you should receive in the mail an annual water quality report (consumer confidence report) from your water supplier that tells where your water comes from and what's in it.

5. Make a Freedom of Information Act (FOIA) Request. Visit the [EPA Freedom of Information Office Web site](#) for instructions.

Your [feedback](#) will help us better meet your drinking water data needs.
