### Campaign Summary Information

## CAMPAIGN SUMMARY INFORMATION

### Campaign Details

Name: Tropospheric Aerosol Radiative Forcing Observational Experiment

Dates: 07 July - 26 July 1996

Location: Atlantic Ocean & Eastern USA

Principal Investigators: Dr. Didier Tanre (CNRS-Lille, France)

Additional Sensors:

Objective: To determine the direct radiative impact of aerosols

on the climate and to understand their chemical, physical, and optical properties.

### Processing Information

Flights Processed: 10 of 10

Total Flight Tracks:

Total Scanlines:

Level-1B Version: #1

Calibration Type: Final

Calibration Version: TARFOX ARC 1.0

Temperature Adjustment: None

Status: Level-1B Data in HDF format is available.

### Spectral Information
