BALL LIGHTNING RESEARCH PAPERS (Tesla website)

1996 Bill Beaty

Science of Ball Lightning 1988 Waseda Univ. Y.H.Ohtsuki, ed.
International Symposium on Ball Lightning
Pub: World Scientific, 1989, Teaneck, NJ
http://home.wxs.nl/~icblsec/pg_ohtsu.html

A collection of papers from a recent symposium. I was particularly fascinated by the large number of videotapes of BL made by the public in Japan, where camcorders are apparently more common than in the US.

Fire Balls, Fractals, and Colorado Springs: A Rediscovery of Tesla's RF Techniques, PROCEEDINGS OF THE 1990 INTERNATIONAL TESLA SYMPOSIUM by Kenneth L. Corum & Dr. James F. Corum
Pub: International Tesla Society, Colorado Springs CO
<http://www.tesla.org>

Corum and Corum reproduce Nikola Tesla's BL production technique! This type of BL arises when RF arcs with impulsive envelopes vaporise carbon, and the Corums believe the phenomena to be a sort of stable combustion process with carbon or copper and ozone, with a diffusion-limited agglomeration structure (aerogel) which somehow slows the combustion process. Their 'fireballs' range in size up to 5cm, last several seconds, change color with time, and sometimes terminate existence with a bang. Numerous photos and video stillframes of the phenomena.
