**[UK Guardian: Arctic CO2 levels growing at an 'unprecedented rate', say scientists](#)**

May 4, 2009, 2:04 pm by dan | Climos Notes

The UK Guardian reports today on record CO2 numbers from a key arctic station. "The concentration of carbon dioxide in the atmosphere has reached a record high, according to the latest figures released by an internationally regarded measuring station in the Arctic. The measurements suggest that the main greenhouse gas is continuing to increase in the atmosphere at an... [>>>](#)

**[Nature editorial calls for geoengineering.](#)**

May 4, 2009, 1:45 pm by dan | Climos Notes

Nature calls for serious consideration of geoengineering in their lead-off editorial this last week. "The latest scientific research suggests that even a complete halt to carbon pollution would not bring the world's temperatures down substantially for several centuries. If further research... [>>>](#)

**[AMS issues draft statement on geoengineering](#)**

April 20, 2009, 1:58 pm by Dan | Climos Notes

The AMS Draft Statement on Geoengineering the Climate System is available via the AMS home page now... If you have comment on this draft AMS Statement currently under consideration, you may transmit those comments to the AMS Council by sending a... [>>>](#)

**[Truthout: Toward Climate Geoengineering?](#)**

April 20, 2009, 1:39 pm by dan | Climos Notes

While I sympathize with the takeaway from the preamble of this truthout opinion piece by Australian paleoclimatologist Dr. Andrew Glikson, I think this frame is unhelpful to the... [>>>](#)

**Climos In The News**

January 4, 2009

Tom Merrit (Executive editor of CNET TV) and Roger Chang from East Meets West interview Climos CEO Dan Whaley

October 31, 2008

Emma Ritch writes on the recent London Convention/Protocol decision to allow legitimate scientific research for ocean iron fertilization.

October 10, 2008

BBC correspondent, Richard Black, reports on the panel discussion of ocean iron fertilization. Dr. Margaret Leinen was a speaker on this panel. Please scroll down the report to Thursday Oct 10 for the article on ocean iron fertilization.

**[What does Climos do?](#)**

Climos is exploring techniques for naturally removing large amounts of CO2 from the atmosphere. One such technique, Ocean Iron Fertilization (OIF), is based on a natural process that is one of the Earth's primary natural mechanisms to remove carbon dioxide. It has very high mitigation potential... [>>>](#)

**Recent Science****[The next generation of iron fertilization experiments in the Southern Ocean](#)**

August 29, 2008

Of the various macro-engineering schemes proposed to mitigate global warming, ocean iron fertilization (OIF) is one that could be started at short notice on relevant scales. It is based on the reasoning that adding trace amounts of iron to iron-limited phytoplankton of the Southern Ocean will lead... [>>>](#)
