SAIC Awarded Contract by The Department of Energy, National Nuclear Security Administration

SAN DIEGO and MCLEAN, Va., Jan 15, 2009 /PRNewswire-FirstCall via COMTEX News Network/ --

Company to Provide National Environmental Policy Act (NEPA) Support Services

Science Applications International Corporation (NYSE: SAI) today announced it has been awarded a prime contract by The Department of Energy/National Nuclear Security Administration (DOE/NNSA) to provide National Environmental Policy Act (NEPA) support services. The multiple award, indefinite delivery/indefinite quantity contract has a two year base period of performance, three one-year options and a total contract ceiling of $200 million for all awardees. Work will be performed primarily in Washington, DC, and at DOE/NNSA locations as required.

The National Environmental Policy Act (NEPA) requires federal agencies to integrate environmental values into their decision making processes by considering the environmental impacts of their proposed actions and reasonable alternatives to those actions. Under this contract, SAIC will help DOE/NNSA meet this requirement by providing technical analysis and preparation of NEPA documentation including environmental impact statements, environmental assessments, supplement analysis, and other special studies. SAIC will also evaluate chemical, nuclear, and biological impacts; and support public outreach programs, comment response management, wetland/floodplain assessments, and cultural resource studies as required.

"SAIC has provided NEPA support to DOE/NNSA for more than 10 years," said J.T. Grumski, SAIC senior vice president and business unit general manager. "We look forward to continuing to help them pursue their critical energy and national security missions, while protecting the health and safety of their employees, and maintaining responsible stewardship of the physical environment at and in the vicinity of their sites."

About SAIC

SAIC is a FORTUNE 500(R) scientific, engineering, and technology applications company that uses its deep domain knowledge to solve problems of vital importance to the nation and the world, in national security, energy and the environment, critical infrastructure, and health. The company's approximately 45,000 employees serve customers in the Department of Defense, the intelligence community, the U.S. Department of Homeland Security, other U.S. Government civil agencies and selected commercial markets. SAIC had annual revenues of $8.9 billion for its fiscal year ended January 31, 2008. For more information, visit www.saic.com.
