Environmental Protection Agency Awards $26 Million Task Order to SAIC
Company to Support the Development, Operations and Maintenance of Software and Data Delivery Components, Helping Enhance Information Sharing

MCLEAN, Va., April 7, 2010 /PRNewswire via COMTEX News Network/ -- Science Applications International Corporation (SAIC) (NYSE: SAI) today announced it has been awarded a task order by the Environmental Protection Agency (EPA) to provide technical services and information technology (IT) support to the EPA's Office of Environmental Information (OEI). The follow on task order has a one-year base period of performance, four one-year options, and a total value of more than $26 million if all options are exercised. Work will be performed primarily in the National Capital Region. The task order was awarded under EPA's Software Engineering and Specialized Scientific Support (SES3) Blanket Purchase Agreement (BPA).

OEI manages the life cycle of information to support EPA's mission of protecting human health and the environment. It identifies and implements IT and management solutions that strengthen the agency's ability to ensure the quality of information, and the efficiency and reliability of technology, data collection, exchange efforts, and access services. Under the contract, SAIC will support the development, operations and maintenance of EPA software, data delivery, and related components. These services will help the agency enhance information sharing between its headquarters, regional organizations, and supporting entities. SAIC will also provide database management and support, and design and development services for GIS (geographic information system) components, and interface/access systems, such as My Environment, a web-based application providing meaningful environmental information to the public in a single search.

"We are pleased to continue our support of this important customer, helping the EPA sharing important environmental information internally and with all Americans through easy and accessible Web sites and databases," said Doug Wagoner, SAIC senior vice president and business unit general manager.

About SAIC

SAIC is a FORTUNE 500(R) scientific, engineering, and technology applications company that uses its deep domain knowledge to solve problems of vital importance to the nation and the world, in national security, energy and the environment, critical infrastructure, and health. The company's approximately 45,000 employees serve customers in the U.S. Department of Defense, the intelligence community, the U.S. Department of Homeland Security, other U.S. Government civil agencies and selected commercial markets. Headquartered in McLean, Va., SAIC had annual revenues of $10.8 billion for its fiscal year ended January 31, 2010. For more information, visit www.saic.com. SAIC: From Science to Solutions(R)

Statements in this announcement, other than historical data and information, constitute forward-looking statements that involve risks and uncertainties. A number of factors could cause our actual results, performance, achievements, or industry results to be very different from the results, performance, or achievements expressed or implied by such forward-looking statements. Some of these factors include, but are not limited to, the risk factors set forth in SAIC's Annual Report on Form 10-K for the period ended January 31, 2010, and other such filings that SAIC makes with the SEC from time to time. Due to such uncertainties and risks, readers are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof.
